## Step 2: Install the ATAS Platform

- Click the download button on the web page opened via the verification link.
- Open the installer file once it finishes downloading.

During installation, you'll be asked to choose one of the following versions:

- Stable: Most reliable. Fewest updates.
- Latest: Balanced updates and features.
- Beta: Latest features, frequent updates.

Choose the version that suits your preference and complete the installation.

## Step 3: Launch and Log Into ATAS

After installation:

- 1. Open the ATAS platform.
- 2. Enter your Login and Password from the ATAS email.

**Tip**: You can switch between versions (Stable, Latest, Beta) anytime by using the selector in the bottom-right corner of the ATAS launch screen.

(Optional) You may see a pop-up with questions about your preferences. You can either complete them or skip to continue.

#### Step 4: Add and Configure Rithmic Connection

Once you're on the ATAS Home Screen:

- 1. Navigate to the **Connections** section.
  - If you're logging in after the initial setup, the **Connections tab** is located at the top of the screen.
- 2. Click **Add** to create a new connection.
- 3. Under the list of available services, choose **Rithmic** from the **US and EU Markets** section.
- 4. In the setup window:
  - **Connection Name**: Enter a name for your connection (e.g., "My Rithmic Account").
  - **Rithmic Username**: Enter the username provided by PropShopTrader (PST).
  - Rithmic Password: Enter your corresponding password.
  - **Server**: Select PropShopTrader (Chicago Area) from the dropdown.

#### Important

If you are trading with a prop firm account, make sure **R|Trader Pro is running in the background** before connecting through ATAS.

- If you want to connect via R|Trader Pro, check the box labeled: "Connect via RTrader Pro"
- If you prefer to use a **direct Rithmic connection**, leave this box **unchecked**.

⚠ **Note**: If you choose to connect via R|Trader Pro but the program is not open, the connection will fail. Always launch R|Trader Pro first if using this method.

## Step 5: Finalize and Connect

- Click **Finish** to save your settings.
- Your new Rithmic PST connection will now appear in your connections list.
- Click the **Connect** button on the right side.

If your credentials are correct, the connection status will change to **"Connected."** 

**Poptional**: Enable **"Auto Connect"** to have ATAS connect automatically each time you launch the platform.
