

Tickblaze Connection Guide

Who Is This Guide For?

- New Tickblaze Users follow the full setup including activation and password creation.
- Existing Tickblaze Users skip to login and connection steps.

For New Tickblaze Users

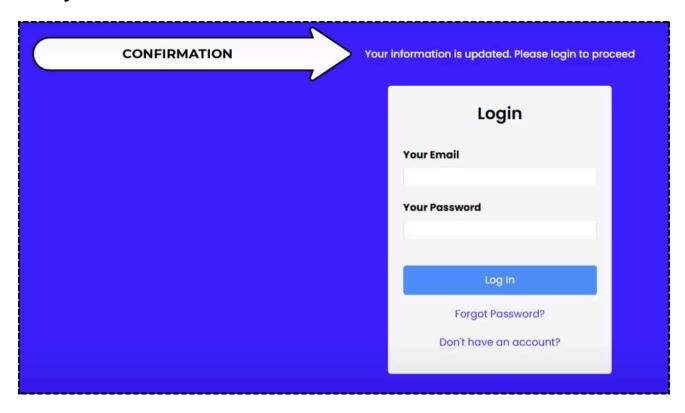

Step 1: Activate & Download Tickblaze

Tickblaze is our preferred trading platform and is **included** with your PST account. Before downloading, please activate your account:

- 1. **Go to the <u>Tickblaze Member's Area</u>** and enter your **email** and **temporary password** received in your onboarding email.
- 2. Complete the registration form:
 - Update your name
 - Set a new password

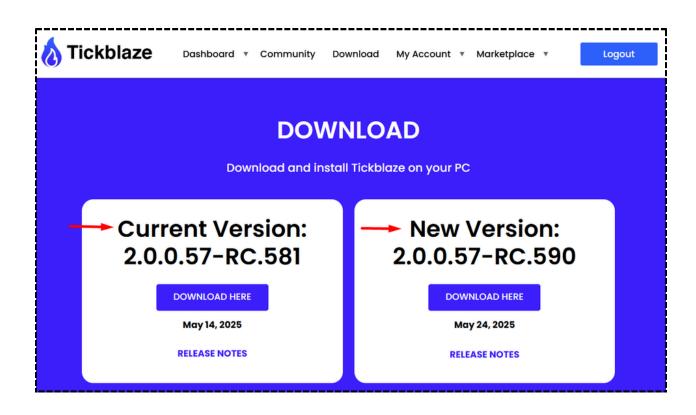

After that you will receive a confirmation:

Once completed, you can download Tickblaze directly from the Member's Area:

http://members.tickblaze.com/downloads

We recommend downloading the **Current Version** for best stability. The **Beta Version** offers early access to new features but may have bugs.

Step 2: Download & Log In to R|Trader Pro

Before you begin using Tickblaze, you must first log into **R|Trader Pro** using your PropShopTrader (PST) credentials. This step is mandatory and ensures proper risk management and order routing.

- 1. Open the R | Trader Pro application.
- 2. Click on 'Remember Me' so the system saves your credentials and you don't have to enter them each time you log in.
- 3. Orders: Ensure this is turned [On]
- 4. Leave Selective Load turned OFF.
- 5. Copy and paste your **Rithmic ID** and **Password in both sections**.
- 6. Set the **System** to: **PropShopTrader**.
- 7. Set the **Gateway** to: **Chicago Area or the area closest to you.**
- 8. Market Data: Ensure this is turned [On]. Use the same credentials as above.
- 9. **Allow Plugins**: Click on **'Allow Plugins'** to turn this feature **ON**. This enables position syncing between Rithmic and your external trading platform.

Important

R|Trader Pro must remain open in the background while using Tickblaze.

For Existing Tickblaze Users

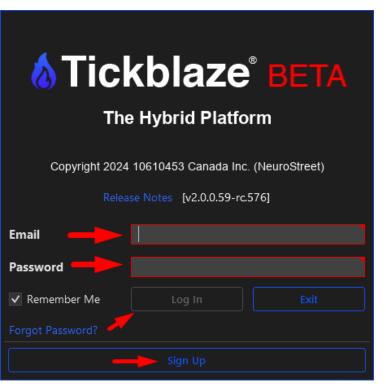

Step 1: Log In to Tickblaze

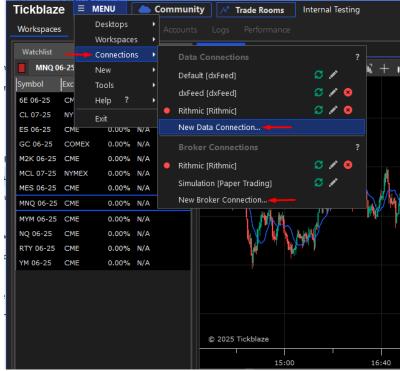

- 1. Launch the **Tickblaze** platform.
- 2. Log in using your existing credentials.
- Forgot your password? Reset it via the Tickblaze Member's Area.

Steps for All Users: Connect Tickblaze to Rithmic

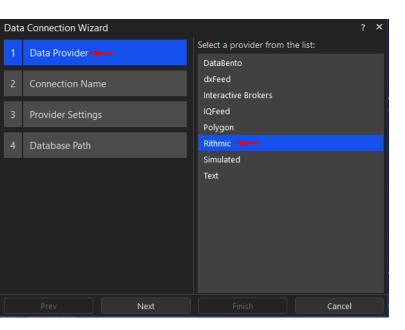

Step 1: Log into Tickblaze using your credentials

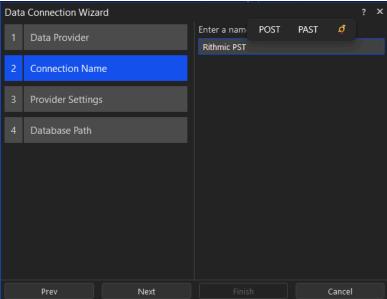

Step 2: Go to Menu (≡) → Connections → Click New Data Connection

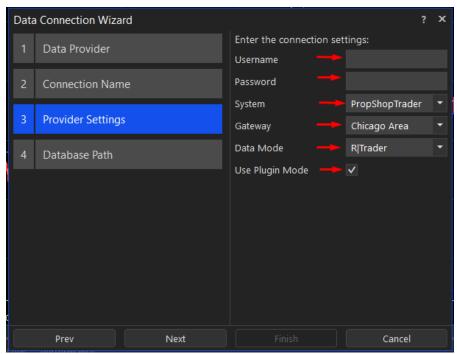

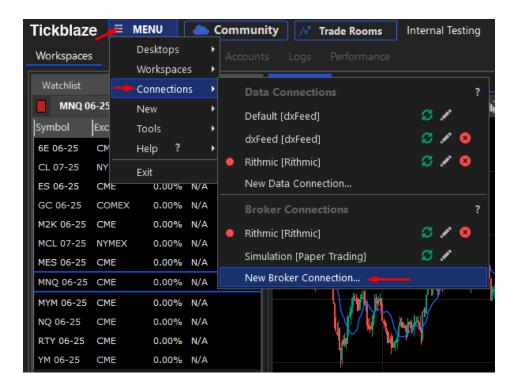

Step 3: Select Rithmic as your provider → Add a Connection Name → Enter your PST's Rithmic credentials under 'Provider Settings' → Select 'Data Mode' as 'R|Trader' → Check the 'Use Plugin Mode' box

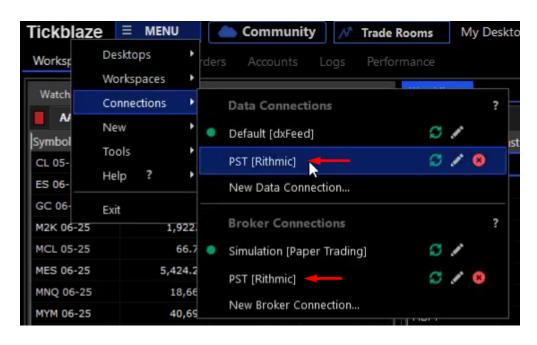

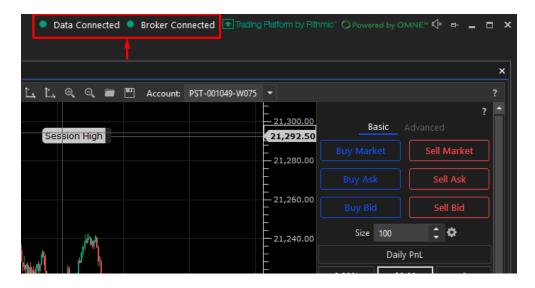

Step 4: Repeat the same process for 'New Broker Connection'

Step 5: Once setup is complete, return to the **Connections** section and select both the **Data Connection** and **Broker Connection** you created.

After a successful connection, you'll see 'Data Connected' and 'Broker Connected' indicators near the top border of the Tickblaze window, confirming that both connections are active with a green dot.

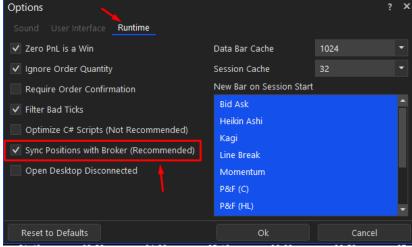

Step 6: Sync Positions with Rithmic

- 1. Go to Menu (\equiv) \rightarrow Tools \rightarrow Options (CTRL + ALT + P)
- 2. Select **Runtime** from the right-hand tab.
- Check the box: Sync Positions with Broker (Recommended)

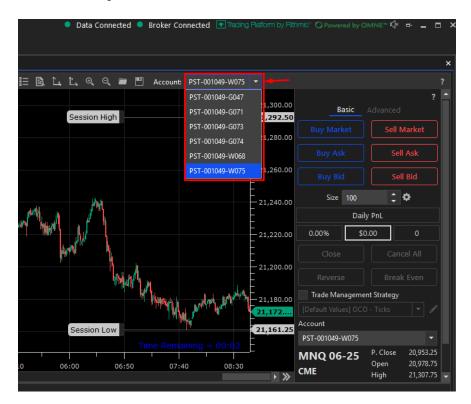

This ensures your trades are mirrored properly between Tickblaze and R|Trader Pro.

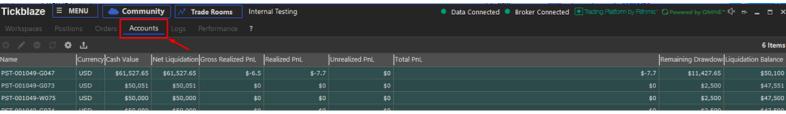

You can now:

- View all trading accounts from the **Account** field on your charts
- Monitor your trades via the Accounts tab
- Execute orders confidently across Tickblaze and R|Trader Pro

You're All Set!

You've now:

- Activated Tickblaze
- Connected to Rithmic Data
- Synced your PST account
- Enabled real-time risk sync between platforms
- Selected your account to trade on
